OBJECTIVE

A B.Tech Computer Science and Engineering student at Amity University Kolkata, aiming to secure a challenging position in a reputable organization to expand my knowledge, learning, and skills while making a significant contribution to the success of the company. Enthusiastic student eager to contribute to team success through hard work, attention to detail and organizational skills.

EDUCATION

Amity University Kolkata **2019 – 2023**
Bachelor of Technology in Computer Science *Kolkata, India*
CGPA : 8.76 (Till 5th Semester)

Ashok Hall **2005 – 2019**
CBSE *Kolkata, India*
Class XII : 86 Percentage
Class X : 9.6 CGPA

INTERNSHIP EXPERIENCE

Coding Ninjas **March 2022 – May 2022**
Technical Content Writer Intern *Kolkata, India*

- In this position, I had written over 40+ articles on Computer Science and related topics, which were published on the CodeStudio platform.

Ziroh Labs **January 2022 – February 2022**
Project Intern *Kolkata, India*

- This was a component in a live project which would directly affect the client's users.
- Had to configure the MySQL server based on user inputs using Python Scripts.

Codespeedy Technology Private Limited **May 2020 – June 2021**
Python Developer *Kolkata, India*

- In this position, I had to build Python projects for CodersPacket.com which is an online project and package or source code providing solution website of the company for other developers to use.
- Wrote code explanation and documentation for other developers to understand.

PROJECTS

OTP Verification | Python **December 2021**

- You need to have your Google app password to be able to send emails using your Gmail account.
- After you create your app password for your Gmail account you will get a key. Copy that key and paste in the code below to send emails for OTP verification using Python.

JARVIS AI - A Desktop Voice Assistant | Python **May 2022**

- Some predefined tasks will be automated by JARVIS by just giving user's voice command. It takes the user's microphone input and returns a string output.
- Some of the defining tasks were to search something on Wikipedia, open YouTube site in browser, open Google site in browser, to play music, to know current time, to open VS Code Program and to send E-mail

TECHNICAL SKILLS

Languages: C++, Python, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, MySQL

Technologies/Frameworks: Windows, Linux, GitHub
